MAURICIO PEÓN GARCÍA

FULL-STACK ENGINEER · CO-FOUNDER & CTO · AI PRODUCT

yo@maupeon.com | +52 55 2109 0491 | maupeon.com | linkedin.com/in/mauricio-peon | github.com/maupeon

Full-stack engineer and technical co-founder who built a platform from zero to **200,000+ users across 21 countries** and grew the team to 20 while staying hands-on in the code daily. Six years shipping production applications with Next.js, React Native, Python and AWS — from live video infrastructure and interactive 3D interfaces to LLM-powered features running in production. Holds an M.S. in Data Science, Big Data & AI.

EXPERIENCE

Co-founder & CTO — Medu · Medical education platform — 2019 – Present

- Architected and built the entire product from scratch: Next.js web app, React Native apps for iOS and Android, REST APIs, and AWS infrastructure (Amplify, Lambda, S3, CloudFront).
- Scaled to **200,000+ health professionals in 21 countries** with 31 courses and 146 live surgeries; grew and led a team of 20 across engineering, product and content.
- Closed and delivered enterprise accounts with **Eli Lilly, Novo Nordisk and Pfizer**, owning both the technical integration and the commercial relationship.
- Built video streaming infrastructure for live surgical broadcasts handling thousands of concurrent viewers, including adaptive delivery and graceful degradation on unreliable hospital networks.
- Shipped LLM features to production, not prototypes: Spanish medical speech-to-text, clinical case generation, and AI-generated audio learning — with evaluation, cost control and latency handled end to end.
- Built complex interactive interfaces: clinical case simulators and real-time gamified quiz systems.
- Led product strategy and enterprise sales while writing code daily — full ownership from infrastructure to UI to revenue.

Business Analyst Intern — IBM — Jun 2019 – Jun 2020

- Developed ETL pipelines and data solutions for banking clients using SQL databases.
- Translated complex business requirements into technical specifications across cross-functional teams.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, Python, SQL, HTML/CSS
Frontend:	React, Next.js, React Native, Three.js, D3.js, Tailwind CSS
Backend:	Node.js, REST APIs, GraphQL, AWS Lambda, Firebase Cloud Functions
Infrastructure:	AWS (Amplify, S3, CloudFront, Lambda), PostgreSQL, MongoDB, Firebase, Docker, CI/CD, Git
AI & Data:	LLM API integration, RAG, speech-to-text, pandas, scikit-learn, matplotlib, statistical modeling
Other:	iOS/Android App Store deployment, live video streaming, deep linking, Stripe

SHIPPED PROJECTS

- **Medu IA** — AI learning assistant with interactive virtual patients, clinical case simulation, adaptive quizzes, and podcast generation from medical documents.
- **¿Te tocó?** — Decision-making app with interactive 3D dice. React Native, Three.js. Published on the App Store.
- **Guardia** — Personal safety check-in app with automated alerts and emergency contacts. React Native, Supabase.
- **Meditation app (in progress)** — AI-generated content with ElevenLabs text-to-speech.

EDUCATION

M.S. Data Science, Big Data & AI · Universidad Complutense de Madrid — 2025 – 2026

- Machine learning, time series analysis, data mining, statistical modeling, NLP.

B.S. Computer Science & Technology Engineering · Tecnológico de Monterrey (ITESM) — 2016 – 2020

- Graduated with distinction — Excellence Diploma ×4.

ADDITIONAL

- **Languages:** Spanish (native), English (advanced).
- **Speaking & writing:** Panelist at Mexico Health Summit 2025 and Neuron IT Forum 2025; technology columnist for Mexico Business News, 2025 – present.
- **Endurance athlete:** Valencia Marathon 2025 (3:51) and 5 km open water swim.
